- Operating Systems: Windows (7, 8, 10), Linux (Ubuntu), MacOS

Work Experience:

8/17-present **UP Web Services, Portland, OR, Lead Student Web Developer**

- Backend development with Java, creating apps, web services, and APIs.
- Frontend development with HTML, CSS, and JavaScript.
- Built custom web applications designed to pinpoint a specific user group.

Projects:

11/17-present **Chrome Extension, Recent PDF, Creator**

- Published a Chrome extension ([Recent PDF](#)), constantly updated, over 135 users.
- Extremely active open source [GitHub repository](#), where I manage pull requests, bug tracking, and feature requests.

8/18-present **Android app, Settlers of Catan, Project Manager**

- Implemented the popular Settlers of Catan game into an Android app.

Other projects:

- APIs and web apps using Azure storage containers and serverless functions.
- Designed and built many modern portfolio sites.
- Contribute to a range of open source projects on GitHub.

Other Experience:

5/18-7/18 **Crown Equipment, KEEN Engineering, Ada, OH, Project Manager**

- Elected project leader and my team was awarded best design and best presentation.
- Developed algorithms for hydraulic positioning systems in C.
- Helped struggling team members gain confidence in their presentation skills.

Activities:

- Economics club, ACM.
- Contributing to open source projects and events.
- Tutoring and teaching students and kids to program.
- Basketball, running, and writing.
- Led lectures on the basics of Python while volunteering for CoderDojo.

Education:

University of Portland, Portland, OR, BS in Computer Science 2017-2021, (GPA 3.75/4.0)
